COMPANY PROFILE 企业简介

深圳市阿尔法电气有限公司

阿尔法创立于2000年，是专业从事工业自动化设备、新能源汽车动力总成系统及关键零部件研发、生产、销售与服务的国家高新技术企业。

公司总部位于广东省深圳市，华东基地位于浙江省嘉兴市，华中基地位于江西省宜春市，综合面积超过20万平方米。创立20年至今，阿尔法拥有多条自动化生产线，多个研发实验室及可靠性实验室，并通过ISO9001:2015质量体系认证。阿尔法公司不断引进国内外先进技术，与多家科研机构、高等院校建立联盟，以技术为先导专业创新，获得多项发明、外观设计及实用新型专利。

在工业自动化领域，致力于为机械设备客户提供整套解决方案，功能强大、控制灵活、性能优异。在机床、纺织、冶金、起重、油田、塑胶、化工、市政等行业已经广泛应用。目前主要产品有变频器、感应伺服、永磁同步电机、PLC、HMI、电梯一体化驱动器、电液伺服等。

在新能源汽车领域，矢志追求新能源汽车能源转化与利用效率关键技术，能全面涵盖新能源汽车应用的动力总成系统及其核心零部件制造商，拥有丰富的产品组合，包括电机控制器、电机、整车控制器、电池管理系统、车载充电机、DCDC电源、气泵电机控制器、转向助力电机控制器等。

Shenzhen Alpha Electric Co., Ltd.

Founded in 2000, Alpha is a country specializing in the R&D, production, sales and service of industrial automation equipment, new energy vehicle powertrain systems and key components high-tech enterprises.

The company is headquartered in Shenzhen, Guangdong Province, East China Base is located in Jiaxing City, Zhejiang Province, and Central China Base is located in Yichun City, Jiangxi Province, with a combined area of more than 200,000 square meters. Founded 20 years To date, Alpha has multiple automated production lines, multiple R&D laboratories and reliability laboratories, and has passed ISO9001:2015 quality system certification. Alpha Corporation Continue to introduce advanced technologies at home and abroad, establish alliances with many scientific research institutions and colleges and universities, take technology as the leading professional innovation, and obtain a number of inventions, designs and practical New patents.

In the field of industrial automation, we are committed to providing complete solutions for mechanical equipment customers, with powerful functions, flexible control and excellent performance. In machine tools, textiles, metallurgy, Heavy, oilfield, plastic, chemical, municipal and other industries have been widely used. At present, the main products are frequency converter, induction servo, permanent magnet synchronous motor, PLC, HMI, elevator one Integrated drive, electro-hydraulic servo, etc.

In the field of new energy vehicles, we are determined to pursue the key technologies of energy conversion and utilization efficiency of new energy vehicles, which can comprehensively cover the powertrain system and its nuclear application of new energy vehicles. Manufacturers of spare parts, with a rich product portfolio, including motor controllers, motors, vehicle controllers, battery management systems, car chargers, DCDC power supplies, Air pump motor controller, steering assist motor controller, etc.

ALPHA

品质彰显价值 服务传递真诚

COMPANY CULTURE 企业文化

经营理念：积累树人，专业创新

品牌理念：品质彰显价值，服务传递真诚

企业愿景：成为全球一流的自动化与新能源汽车动力总成产品与服务的供应商

价值观：构建以人的成长为核心的发展平台，实现企业与合作伙伴的可持续回报。

Business philosophy: accumulation of talents, professional innovation

Brand concept: quality shows value, service delivery is sincere

Corporate Vision: To become a world-class supplier of automation and new energy vehicle powertrain products and services

Value view: Build a development platform centered on human growth to achieve sustainable returns for companies and partners.

品质彰显价值 服务传递真诚

PRODUCT ADVANTAGES 产品优势

1. 阿尔法 AT 系列 PLC 核心算法采用 AR 技术, 产品运行稳定可靠。

1. The core algorithm of Alpha AT series PLC adopts German AR company technology, and the product runs stably and reliably

2. 应用层开发由中国本地团队完成, 使用更加灵活方便。

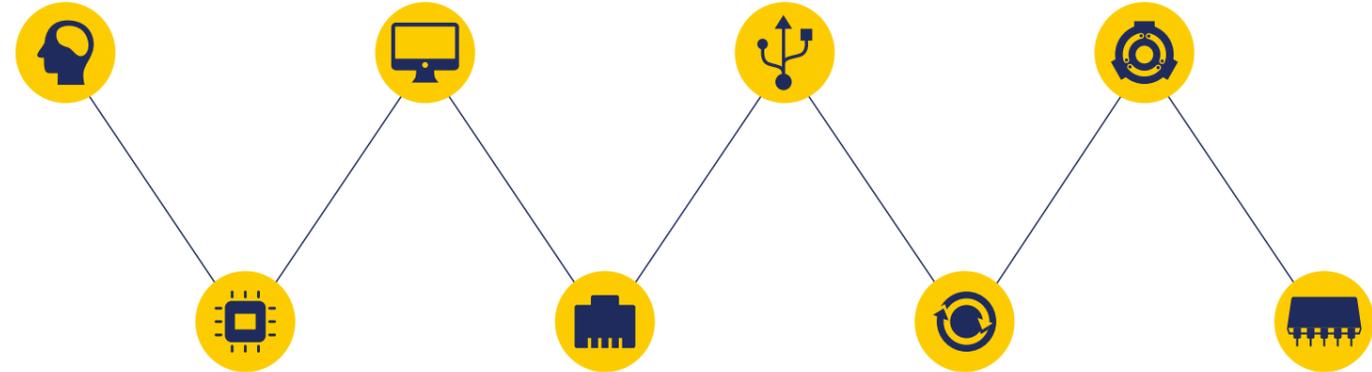

2. The development of application layer is accomplished by the local team in China, which is more flexible and convenient to use.

3. 灵活的通讯功能(支持 MODBUS RTU、MODBUS ASCII、自由口协议等多种通讯协议)使客户进行通讯扩展时更方便快捷。

3. Flexible communication functions (supporting MODBUS RTU, MODBUS ASCII, free-port protocol and other communication protocols) make it easier and faster for customers to extend their communication.

4. AT 3000 CPU 强大的运动控制功能最高可支持 100 轴的点位运动控制。

4. The powerful motion control function of AT 3000 CPU can support up to 100-axis point position motion control.

5. 多 CPU 协同工作充分利用并行 CPU 的高速处理和串行 MCU 的方便灵活使用系统更加更灵活高速方便。强大的运算处理能力, 最快指令周期只有 0.01us。

5. Multi-cpu collaborative work makes full use of high-speed processing of parallel CPU and convenient and flexible use of serial MCU. The system is more flexible, high-speed and convenient. Powerful computing and processing capabilities, the fastest instruction cycle only 0.01us.

6. 多种总线接口, 强大的网络处理功能, 为客户实现工业 4.0 升级和工业信息采集实现提供了硬件接口。

6. Various bus interfaces and powerful network processing functions provide hardware interfaces for customers to realize industrial 4.0 upgrade and industrial information acquisition.

7. 最高 128kb 的程序存储空间和 30kb 的数据存储空间。数据空间和程序空间独立分开, 系统运行采用哈佛结构体系, 运行可靠保证速度。

7. Up to 128 KB of program storage space and 30 KB of data storage space. Data space and program space are separated independently. The system runs with Harvard structure system, which ensures reliable operation and speed.

8. 非易失型数据采用铁链式 EEROM, 有效防止长时间失电造成数据丢失的问题。

8. Chain EEROM is used for non-volatile data, which can effectively prevent data loss caused by long-term power loss.

大型高速PLC LARGE HIGH SPEED PLC

◎ 性能规格/Performance Specification

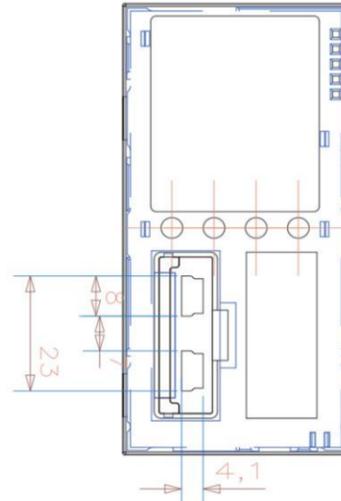

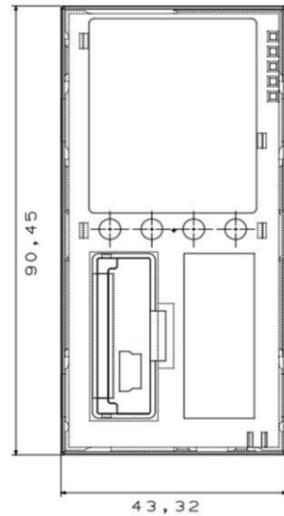

- 24V DC供电输入 (宽电压输入18V-36V)
- 1路RS232 串行编程口 (固定通讯格式 38400, E, 8, 1)
- 1路RS485通讯接口 (9600bps, 8bit, NONE, 1bit)
- 2路RJ45. MODBUS TCP 从机协议 (客户端和服务端可选)
- 程序空间128KByte • 用户数据空间30KByte
- 程序指令处理最快0.01us。 • 1.44真彩液晶可作为软元件的状态显示
- 四个功能按键可以作为显示的切换也可作为设定数据使用
- AT Bus内部总线协议可连接多种外设

- 24V DC power supply input (wide voltage input 18V-36V)
- 1RS232 Serial Programming Port (Fixed Communication Format 38400, E, 8, 1)
- 1-way RS485 communication interface (9600bps, 8bit, NONE, 1bit)
- The 2 way is RJ45. MODBUS TCP slave protocol (Client-side and server-side options)
- Program Space 128KByte • User Data Space 30KByte
- The fastest processing speed of program instruction is 0.01us
- 1.44 true color liquid crystal can be used as state display of soft components
- Four function keys can be used as display switching or setting data.
- ATBus internal bus protocol can connect multiple peripherals

AT-200S系列接口定义 AT-200S Series Interface Definitions

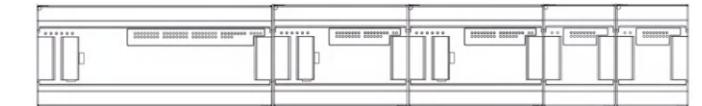

如右图所示 As shown on the right

- 1.13位本体脉冲输出接线端子台 (欧式通用20位)
- 2.U1端口 Mini USB 232通讯端口
- U2端口 RJ45 TCP通讯 (192.168.1.5)
- 1.13-bit bulk pulse output terminal (European universal 20-bit)
- 2.U1 Port Mini USB 232 Communication Port
- U2 port RJ45 TCP communication (192.168.1.5)

扩展设备/Extension Device

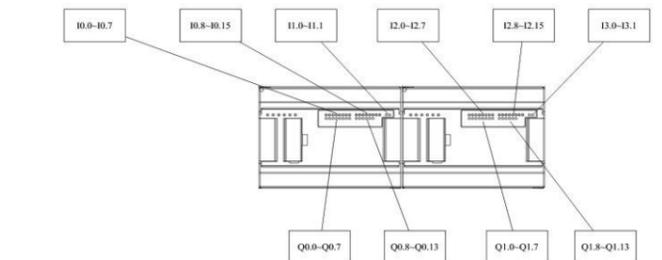

- 一个基本单元只能扩展1个I/O模块
- 使用扩展连接电缆接好基本单元和扩展模块之后, 扩展模块的PWR指示灯亮, 则扩展模块可正常使用。
- 本地扩展24V单独供电
- A basic unit can only extend one I/O module
- After connecting the basic unit and expansion module with the extended connection cable, the PWR indicator light of the expansion module is on, and the expansion module can be used normally.
- Local Extended 24V Separate Power Supply

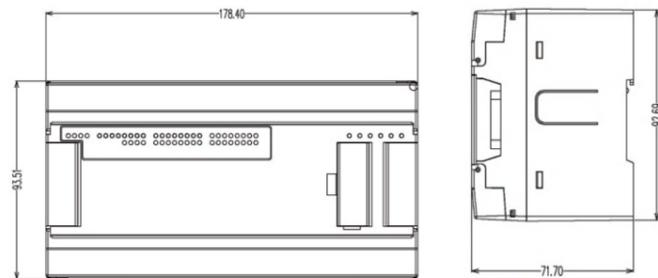

IO点排列/IO point alignment

IO点在排列的时候经常出现空点的情况, 例如: 2个 AT-200S-32T组合使用, 由于单个基本单元包括18个输入点和14个输出点, 由于18已经大于16, 地址空间已经占用了下一字, 所以第2个基本单元的起始地址从第3个字开始。

For example, two AT-200S-32T combinations are often used. Since a single basic unit consists of 18 input points and 14 output points, the address space of the second basic unit has occupied the next word since 18 has exceeded 16, so the starting address of the second basic unit begins with the third word.

AT-200S-48T(4/8)

性能规格/Performance Specification

- 主机IO点数 (28输入、20输出)
- AT-200S-48T4为4轴、AT-200S-48T8为8轴
- 24V DC (宽电压输入18V-36V), 1A供电输入
- 4路可变频率, 差分输出
- 2路AB相高速输入 (4路单相、1路ABZ相)
- 1路RS232 串行编程口 (固定通讯格式38400, E, 8, 1)
- 1路RJ45. MODBUS TCP 从机协议 (客户端和服务端可选)
- 1路RS485串口通讯格式可设定. 兼容MODBUS RTU、MODBUS、ASCII 主从协议和自由口协议
- 程序空间128000Byte
- 用户数据空间30000Byte
- Host IO Points (28 Input, 20 Output)
- AT-200S-48T4 is 4-axis and AT-200S-48T8 is 8-axis.
- 24V DC (wide voltage input 18V-36V), 1A power supply input
- Four variable frequencies, differential output
- 2-way AB phase high-speed input (4-way single-phase, 1-way ABZ phase)
- 1 RS232 Serial Programming Port (Fixed Communication Format 38400, E, 8, 1)
- The 1 way is RJ45. MODBUS TCP slave protocol (optional for client and server)

拨码开关定义/Definition of Dial Switch

温度控制模块: AT-AD-2114、AT-AD-2214

模拟量模块 AT-AD-2324接口定义如下图所示:

①: 平拨式8位拨码开关, 符合8421码定义, 用于定义模块的ID号: ID号=1时, 1#脚位→ON; ID号=3时, 1#、2#脚位→ON。

模块ID = $\sum_{n=1}^8 2^{(6-n)}$ * 拨码开关状态

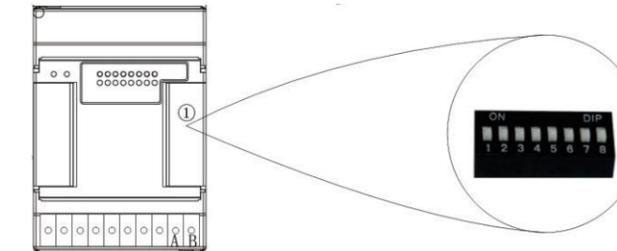

②: RS485接线端口: A: RS485+, B: RS485-。

Temperature control module: AT-AD-2114, AT-AD-2214

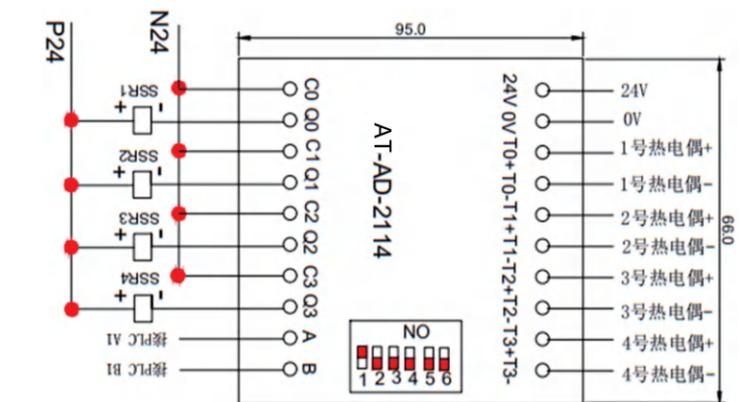

The interface definition of analog module AT-AD-2324 is as follows:

(1) Flat-dial 8-bit dial switch, which conforms to the definition of 8421 code, is used to define the ID number of the module: when ID number = 1, 1 # foot ON; ID = 3, 1 #, 2 # foot ON.

(2) RS485 port: A: Rs485+, B: RS485-.

电源插头示意图及引脚定义如下

AP102EL

AP102EL 是一款以先进的Cortex-A8 CPU为核心（主频1.0G）的高性能嵌入式一体化人机界面。该产品设计采用10.2英寸高亮LED液晶显示器（分辨率1024*600），四线电阻式触摸屏（分辨率4096*4096）。支持WIN CE6.0, 同时预装CORWARE V3.0工业组态软件。

◎ 外部接口/External Interface

接口说明/Interface specification

串口引脚定义/Serial pin definition

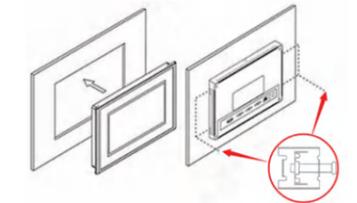

| PORT口 | 接口/Interface | PIN | 引脚定义/Pin definition |
|-------|--------------|-----|---------------------|
| COM | COM1 | 2 | Rs232 RXD |
| | | 3 | RS232 TXD |
| | | 5 | GND |
| | COM2 | 7 | RS485 + |
| | | 8 | Rs485 - |
| | | | |

◎ 产品参数/Product specification

| 项目/project | 规格/Specifications |
|----------------------------|---|
| 液晶屏 LCD screen | 10.1寸TFT液晶屏、LED背光、颜色65535 10.1 inch TFT LCD screen, LED backlight, color 65535 |
| 分辨率 Distinguishing rate | 1024*600 1024*600 |
| 显示亮度 Display brightness | 180cd/m2 180cd/m2 |
| CPU CPU | ARM Cortex A8, 主频1.0G ARM Cortex A8, Main Frequency 1.0G |
| 内存 Internal storage | 256M DDRII RAM 256M DDRII RAM |
| 触摸屏 Touch screen | 四线电阻式, 点动100万次以上 Four-wire resistance type, more than one million times |
| 存储设备 storage device | 256M NAND FLASH 256M NAND FLASH |
| SD卡扩展 SD card extension | 可选, 最大可扩展32G Optional, maximum scalability 32G |
| 接口 Interface | 1*RS232、1*RS485、1*USB 2.0、1*LAN(AT7101S无网口) 1*RS232, 1*RS485, 1*USB 2.0, 1*LAN (AT7101S without network ports) |
| 实时时钟 Real time clock | 有 Yes |
| 蜂鸣器 Buzzer | 有 Yes |
| 重量 Weight | 1.5Kg 1.5Kg |
| 防护等级 Protection level | IP 65(前面板) IP 65 (front panel) |
| 耐压测试 Hi-Pot | 500V AC 1分钟 500V AC 1 minute |
| 抗干扰性 Anti-interference | 工频磁场干扰度5级, 磁场强度100A/m Power frequency magnetic field interference level 5, magnetic field intensity 100A/m |

◎ 挂钩安装说明/Installation instructions for hooks

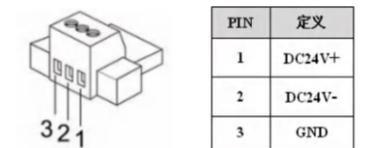

1. 将TPC放置于安装槽内
2. 将挂钩勾脚放于TPC侧面安装孔内, 用十字起拧紧螺丝, 安装完成。

◎ 电源连接/Power connection

- 1: 将DC24V电源线剥线后插入电源插头接线端子中;
- 2: 使用一字螺丝刀将电源插头螺丝锁紧;
- 3: 将电源插头插入产品的电源插座。

电源插头示意图及引脚定义如下

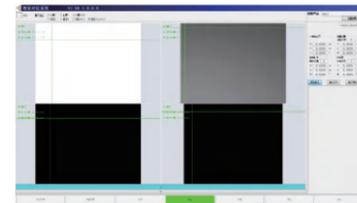

| PIN | 定义 |
|-----|--------|
| 1 | DC24V+ |
| 2 | DC24V- |
| 3 | GND |

视觉系统

vision system

公司长期专注于机器视觉技术在智能制造领域的应用，致力于探索机器视觉技术与运动控制技术在智能制造领域的深度整合方案，应用领域覆盖LCD, PCB, 触摸屏, 锂电池, 激光加工, 新能源等多个行业。并且已经在京东方, 风华, 天马, 华星光电, 纬创, TPK, 伯恩, 业成等工厂大量应用, 产品涉及iPhone系列, iWatch系列, oppo手机, vivo手机, 小米手机等。VS系列视觉软件系统涉及引导(上下mark对位, 定位), 测量, 检测三个大方面, 且可以为客户提供定制化服务。

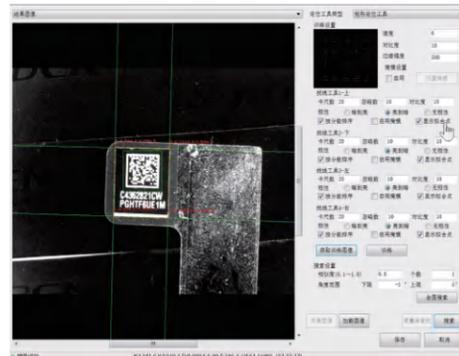

The company has long focused on the application of machine vision technology in the field of intelligent manufacturing, and is committed to exploring the deep integration of machine vision technology and motion control technology in the field of intelligent manufacturing. The application area covers LCD, PCB, touch screen, lithium battery, laser processing, new energy and other industries. And has been widely used in Beijing Oriental, Fenghua, Tianma, Huaxing Photoelectric, Weichuang, TPK, Burn, Yicheng and other factories. The products involve the iPhone series, iWatch series, oppo mobile phone, vivo mobile phone, millet mobile phone and so on. VS series visual software system involves three major aspects: guidance (up and down mark alignment, positioning), measurement and detection, and can provide customized services for customers.

视觉系统介绍/Introduction of Visual System

我司视觉系统由C++编译，能够在底层优化算法，响应更快，效率更高。搭载多种检测工具，有着极强的适应性，能够适应光照不均匀变化，产品颜色不均匀变化，产品有脏污，边缘形状缩放变化大，边缘模糊，边缘纹理丰富等各种复杂情况，显著降低抛料。很多检测工具采用了粗定位+精检测的策略，能够在视野中准确定位精确测量，在精度和效率找到了很好的平衡。

Our vision system is compiled by C++. It can optimize the algorithm at the bottom level. It has faster response and higher efficiency. It is equipped with a variety of detection tools, with strong adaptability, can adapt to uneven changes in light, uneven changes in product color, dirty products, large changes in edge shape, blurred edges, rich edge texture and other complex situations, significantly reducing throwing. Many detection tools adopt the strategy of rough positioning + fine detection, which can accurately locate and measure in a large field of vision, and find a good balance between accuracy and efficiency.

引导类 Boot class

引导类应用是非常重要的机器视觉应用。视觉系统通过相机拍摄产品并定位mark或特征点所在位置，引导设备的机械手臂或者平台移动到指定位置后，设备对产品进行压合，贴附，切割或者是其他加工，也可以是上下料这种简单操作。视觉引导是高精度生产加工设备实现完全自动化的必由之路，视觉系统相比较人工或者机械，能够大幅度提高设备的精度和效率，降低设备的异常报警次数。

Guided application is a very important kind of machine vision application. The visual system takes pictures of the product by camera and locates the mark or feature point. After guiding the mechanical arm or platform of the equipment to move to the designated position, the equipment can press, attach, cut or other processing on the product. It can also be a simple operation of loading and unloading. Visual guidance is the only way to achieve complete automation of high-precision production and processing equipment. Compared with manual or mechanical, visual system can greatly improve the accuracy and efficiency of equipment and reduce the number of abnormal alarms.

测量/检测类 Measurement/Detection Category

测量/检测类应用在工业生产中的发挥着越来越重要的作用。近年来，视觉系统正在渐渐替代传统工艺中的人工质检。并由于系统具有高效率，低成本的特点，部分质检流程由离线检测转变为在线检测。当产品出现异常时，生产线能够“自己”报警，且更加及时和准确。这极大提高了设备稳定的性和生产厂商的品质控制能力。视觉系统能够紧密的结合MES系统，使得每一个产品都“有迹可循”，技术人员即便不在现场，也可以通过数据分析出设备的历史生产状态。当生产出现问题时，技术人员能够更快更准的定位问题点，及时调整设备状态。

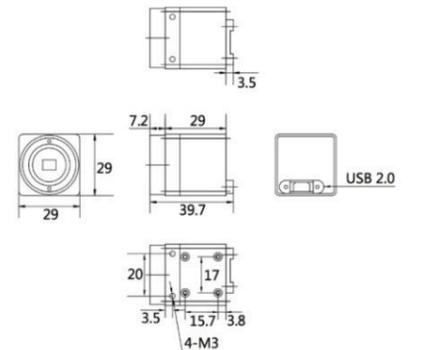

Guided application is a very important kind of machine vision application. The visual system takes pictures of the product by camera and locates the mark or feature point. After guiding the mechanical arm or platform of the equipment to move to the designated position, the equipment can press, attach, cut or other processing on the product. It can also be a simple operation of loading and unloading. Visual guidance is the only way to achieve complete automation of high-precision production and processing equipment. Compared with manual or mechanical, visual system can greatly improve the accuracy and efficiency of equipment and reduce the number of abnormal alarms.

工业相机VS-U2系列 VS-U2 Series of Industrial Cameras

- 结构紧凑，坚固耐用 • Mini USB2.0接口 • 30万, 130万 • 价格极具竞争力
- Compact and durable structure • Mini USB 2.0 Interface • 300,000, 1.3 million • Prices are highly competitive

| 型号 vision system | 分辨率 Resolving power | 帧率 frame rate | 传感器类型 Sensor type | 像元尺寸 pixel size |
|---------------------|------------------------|------------------|----------------------|--------------------|
| VS-A0040B-60U2 | 752(H) x 480(V) | 60 | 1/3" 帧曝光CMOS | 6.0 μm |
| VS-A0130J-30U2 | 1292(H) x 964(V) | 30 | 1/3" CCD | 3.75 μm |
| VS-A0130D-30U2 | 1280(H) x 1024(V) | 30 | 1/1.8" CMOS | 5.2 μm |

工业相机VS-U3系列 VS-U3 Series of Industrial Cameras

- 结构紧凑，坚固耐用 • USB3.0接口 • 130万-2000万像素 • 价格极具竞争力
- Compact and durable structure • USB3.0 interface • 1.3-20 million pixels • Prices are highly competitive

| 型号 vision system | 分辨率 Resolving power | 帧率 frame rate | 传感器类型 Sensor type | 像元尺寸 pixel size |
|---------------------|------------------------|------------------|----------------------|--------------------|
| VS-B130F-90U3 | 1280(H) x 1024(V) | 90 | 1/2" 全局曝光 CMOS | 4.8 μm |
| VS-A0500H-14U3 | 2592(H) x 1944(V) | 14 | 1/2.5" 帧曝光 CMOS | 2.2 μm |
| VS-C0600D-60U3 | 3088(H) x 2064(V) | 60 | 1/1.8" 帧曝光 CMOS | 2.4 μm |
| VS-A1070G-14U3 | 3856(H) x 2764(V) | 14 | 1/2.3" 帧曝光 CMOS | 1.67 μm |
| VS-A2018R-19U3 | 5496(H) x 3672(V) | 19 | 1" 帧曝光 CMOS | 2.4 μm |
